## **Uphill Parking**

1-Slow down, Apply Right MSB, stop no more than 30cm from the Curb.

2-Change gear to (N) & Steering all the way to left, be sure your right signal is on, Release the brake until the right tire touch the curb.

3-Cancel the Signal & gear on (P) and Apply your handbrake.

## **Downhill Parking**

1-Slow down, Apply Right MSB, stop no more than 30 cm from the curb

2-Change gear to (N) & Steering all the way to Right, be sure your right signal is on, Release the brake until the right tire touch the curb.

3-Cancel the Signal & gear on (P) and Apply your handbrake.

Before you go back to the road recover your tiers by steering 2 round to the left before you move the car.

## **Some Tips**

\*Take your time (Do everything slowly), except change lane or turn left.

\*We drive in the right side in the unmarked road within 1m from right curb.

\*In multi lanes road we drive in the **right lane only**. Unless the Examiner ask to change the lane to the left or make left turn or the right lane end or become turn right lane and I am going straight.

\***3 seconds Rule**: stop in the stop sign for 3 seconds (check around in them).

Cancel the Turing signal in 3 seconds after done it.

The following distance between your car and the car ahead of you.

*\*30 meters Rule: slow down before the stop sign or the traffic light or last car in the line.  
Start your MSB before the turn with 30 meters.*

*\*Gear comes first: you start with the gear in any action using the gear.*

*\*When the examiner ask to do any action, release the gas pedal and MSB and slow down by braking. This is 50% of your test*
